ZAID MUZAFFAR

Cloud & DevOps Engineer · BS Computer Science

zaidmuzaffar81@gmail.com | Islamabad, Pakistan

zaidmuzaffar.github.io | github.com/zaidmuzaffar | linkedin.com/in/zaid-muzaffar

PROFILE

Computer Science graduate focused on cloud engineering and DevOps. Completed a 160-hour Cloud & DevOps internship covering Docker, Kubernetes, Terraform and CI/CD with GitHub Actions, with an overall rating of Excellent. Built and deployed a live web application on Firebase that my family's hardware business uses every day, and currently building a safety app with on-device machine learning and a bilingual voice AI assistant. Looking for a Cloud / DevOps role to automate deployment pipelines and run reliable, scalable infrastructure.

EXPERIENCE

Cloud & DevOps Intern

Completed 15 Oct 2026 · 4 weeks, 160 hours

Skill Set Go EduTech · Virtual internship · Overall performance: Excellent

- Containerised an Nginx web application with **Docker** and **Docker Compose** (web + Redis services).
- Wrote a **GitHub Actions** workflow that builds the Docker image automatically on every push and pull request.
- Deployed the application to **Kubernetes** (Minikube) with a Deployment and NodePort Service using kubectl; added ConfigMaps and Secrets.
- Learned the **Terraform** workflow (init, plan, apply) and documented the deployment architecture.
- Linux system administration and shell scripting; tracked work in Zenhub. Completed 16+ practical tasks, 3 mini projects and 2 major projects.

SKILLS

CI/CD & Automation	GitHub Actions · CI/CD pipelines · Git & GitHub · Bash / shell scripting · Zenhub · Agile / Scrum
Containers & IaC	Docker · Docker Compose · Kubernetes (Minikube, kubectl, ConfigMaps, Secrets) · Terraform
Cloud	AWS (IAM, EC2, VPC, S3, Route 53) · Firebase (Hosting, Firestore, Authentication, App Check)
Systems	Linux administration · process management · networking (subnets, routing, DNS) · SSH · environment configuration
Web & Data	JavaScript · HTML/CSS · React.js · Node.js · Express · REST APIs · MongoDB · MySQL · Cloud Firestore
AI & Mobile	Google Gemini API (function calling) · Ollama · TensorFlow Lite · Python · Flutter (Dart)

PROJECTS

Star Pump House – Shop Management System (Live)

Sep 2026 – Oct 2026

- Designed, built and deployed a web app that my family's pump and hardware shop uses every day in place of paper registers: stock, sales, customer credit, suppliers, wholesale accounts, cash closing and profit reports across 23 screens.
- Cloud Firestore with per-user security rules, owner and salesman roles enforced on the server, and Firebase App Check.
- AI assistant using Google Gemini function calling (17 read-only tools) that answers from the shop's records in English or Urdu.
- 57 releases shipped from real user feedback with the Firebase CLI; runs at zero cost on Firebase's free tier.

Tech: JavaScript, Firebase (Auth, Firestore, Hosting, App Check), Gemini AI, Git · Live demo · Code · Demo login: demo@starpumphouse.com / Star123@

Skill Go Lab – DevOps Internship Lab Oct 2026

Week-by-week internship repository: Linux administration reports, a Dockerised Nginx app with Compose, a GitHub Actions build workflow, a Minikube deployment with ConfigMaps and Secrets, and Terraform basics.

Tech: Linux, Docker, Docker Compose, GitHub Actions, Kubernetes (Minikube), Terraform · Code

Automated Linux System Administration & Shell Scripts

Modular Bash scripts automating user access management, environment setup, process monitoring, log parsing and system health checks; versioned and documented in Git.

Tech: Linux, Bash, Git

Lawyer–Client Matching Web Platform – Final Year Project Sep 2024 – Jul 2025

- Web platform matching clients with lawyers by expertise and search criteria, built end to end.
- Designed MongoDB schemas and REST API endpoints for data exchange and payment processing; managed environment variables, CORS policies and server deployment.

Tech: React.js, Node.js, Express, MongoDB, REST APIs

Vigil – Fall Detection & Live Location Safety App (in progress) Oct 2026 – Present

Flutter app with an on-device 1D-CNN fall-detection model (TensorFlow Lite) that alerts trusted circles with live location, a loud alarm and strong vibration; Firebase backend with security rules.

Tech: Flutter (Dart), TensorFlow Lite, Python, Google Colab, Firebase

Voice AI Assistant for macOS (in progress) Oct 2026 – Present

Always-on voice assistant that replies in Urdu or English and controls apps, WhatsApp and the system; Gemini Live online with a local Ollama model as offline fallback; spoken confirmation before destructive actions.

Tech: Python, Gemini Live API, Ollama (Qwen 2.5 14B), macOS automation

EDUCATION

Bachelor of Science in Computer Science Sep 2021 – Jan 2026

COMSATS University Islamabad, Abbottabad Campus

Relevant courses: Operating Systems, Computer Networks, Database Systems, Data Structures & Algorithms, Software Engineering, Web Technologies, Parallel & Distributed Computing, Artificial Intelligence, Machine Learning.

CERTIFICATIONS

- **Cloud & DevOps Internship — Certificate of Completion**, Skill Set Go EduTech (Oct 2026, ID SSG/REG/B1/0457)
- **IBM DevOps and Software Engineering (Coursera):** Introduction to DevOps · Introduction to Cloud Computing · Agile Development and Scrum · Introduction to Software Engineering · Getting Started with Git and GitHub
- Linux Administration & DevOps Practical Hands-on Training (self-paced)

LANGUAGES & VOLUNTEERING

Languages: English (C1, proficient) · Urdu (native) · Pashto (native)

Volunteering, COMSATS University: Tech Club member organising coding competitions and workshops; peer tutor for Programming Fundamentals (C++); volunteer at the University IT Help Desk.
